

Pneumatic & electric automation

Cylinders, valves, fittings, air treatment, vacuum and electric actuation — one of Europe's leading pneumatic brands.

ABOUT CAMOZZI

CamoZZI Automation is an Italian manufacturer of pneumatic and electric automation components. The programme covers the whole pneumatic circuit — cylinders, valves and valve islands, fittings and tubing, air treatment, vacuum — plus grippers, proportional technology, fieldbus systems and electric actuation. Camozzi is a direct, often more economical alternative to SMC and Festo with comparable ISO standard dimensions.
